

TENEBA'S HAVEN, Inc.

SIERRA LEONE WEST AFRICA.

PROGRESSIVE REPORT MARCH, 2021

Since its opening in January 2021, Teneba's haven vocational Institute has made significant progress in the training process in tailoring and most of our students are doing extremely well in performing required basic tailoring skills. The Institute is all-female students who either never went to school, dropped out of school or did not complete grade school and have at least one or more children. Almost all our students can now cut and sew masks, various size curtains, simple dresses, fixing buttons, zippers and more. We have ten sewing machines serving 32 students while the remaining 20 students are placed on the waiting list until machines become available. The staff and students hereby thank you all for making this ministry a viable one. Despite our achievement and progress, Teneba's haven is facing many other challenges.

Listed below are some of our needs:

1. Additional sewing machines (\$ 125.00 each)
2. Solar lighting for the school, (\$ 2,800.00)
3. Motorcycle transportation for teachers, (\$ 1,600.00)
4. Salary for 3 teachers, (\$ 450.00 /month)
5. Salary for 2 security personnel. (\$ 120.00 /month)

Presently teachers and security personnel are getting a monthly stipend which is half or less than half of the recommended government minimum salary. This generosity from our staff will end this school year. Once again, our staff, students and the communities we serve thank our donors wholeheartedly, for this great life-saving project.
